

November 18, 2025: On How Badly Our Military and Politicians Screwed Our Country

Honestly,

Our military and political parties really destroyed a wonderful home that we had in America.

I am confirming that this is an ongoing gang of people that are being fed to my house from inside of the political establishment of Texas and America.

This has been ongoing from the Democrat Party to the Republican Party, and it has been ongoing for years now.

This ongoing effort to 'terrorize' us and 'destroy our lives' represents a large illegal spying presence over our life that is attempting - every, single, day - to engage with our home to cause us discomfort, disruptions, and petty interruptions whenever we are experiencing peace in our home.

Republicans, Democrats: You did this to us. You are the people that let this happen. You are the people that caused this to happen.

American Military Branches and Surveillance State: You did this to us. You are the people that let this happen. You are the people that caused this to happen.

I willingly fought - legally - in the courts of law to help protect our city and state from voter fraud and this - illegal and secret oppression - is the result of my efforts.

Politicians of Texas, and the United States of America: You are a disappointment to our life. You have ruined the country of America, and you are the worst criminals that I ever came across in 10+ years of practicing criminal defense.

"After more than 10 years of defending criminals in the courtroom, the worst criminals I ever saw were coming from inside of the government." - Chris Noel Carlin
